

**Retail & Restaurant Management System**

---

**POS Main features:**

- **Handle day to day sales transaction**
- **Touch Screen function to facilitate user input**
- **Customer Receipt printing function**
- **Inventory enquiry for different locations**
- **Sales statistics / customer and inventory Report**
- **Synchronize function for Legend Solution Group – ERP System**

Our POS solution is easy to get up and running quickly while it is more than a traditional cash register. Also, it can manage inventory and provide reports for managers for making business decisions.

Retail growth is won at the expense of the competition. In a fast-changing retail industry of knowledge-based economy, customer loyalty becomes harder to win. From large department stores to one-item specialty locations to virtual shops on the internet, customers have more choices. Retail industry's success means customer focus.

LSG POS (Point-of-sale) system is an integrated system which could include optional components or functionalities such as Bar-code scanning, Card Reader or automatic Cash Drawer, etc. It is actually a back-office management system which supports multiple platforms such as Microsoft Windows (NT/2000/ME/XP/Vista) or Linux operating system. It is specially designed for the specific needs of retailing business which enables independent retailers to control all facets of their operation, from sales to inventory and from staffing level to pricing. It is powerful, yet easy to use as a business management tool for operation.
